

VINEET R J

Frontend Developer | Java & SQL (Basics) | CI/CD

vrj4196@gmail.com | +91 7829104196 | Bengaluru, Karnataka | linkedin.com/in/vineetrj

PROFESSIONAL SUMMARY

Frontend Developer with 1.7 years of experience building scalable, high-performance web applications using React.js, Next.js, Tailwind CSS, JavaScript (ES6+), and RESTful APIs. Proven track record delivering enterprise-grade SaaS platforms, HRMS systems, and admin dashboards with state management, role-based access control (RBAC), and CI/CD-driven deployment workflows. Working knowledge of Java and SQL fundamentals, with hands-on exposure to Git-based version control and CI/CD pipelines. Adept at writing clean, component-driven, maintainable code aligned with modern engineering standards and Agile collaboration.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), HTML5, CSS3, React.js, Next.js, Redux, Tailwind CSS

Programming (Basics): Java (OOP fundamentals, syntax, basic problem solving)

Database (Basics): SQL (queries, joins, basic schema design)

DevOps & Tools: Git, GitHub, CI/CD (basic pipeline concepts), AWS Amplify, VS Code, Postman

Concepts: RESTful APIs, State Management, Custom Hooks, SSR, Code Optimization, Lazy Loading, Memoization, Role-Based Access Control (RBAC), Version Control, Continuous Integration/Continuous Deployment

Other: Responsive Design, UI Optimization, Debugging, Unit Testing, Cross-functional Collaboration, Agile/Scrum

PROFESSIONAL EXPERIENCE

Frontend Developer | Perisync Technologies Private Limited

June 2024 - Present

Bengaluru, India

Engineered and maintained state management architecture using Redux and React Hooks to enhance user interaction and streamline REST API data flow.

Integrated RESTful APIs for user authentication, data fetching, and real-time updates across multiple enterprise web applications.

Developed and deployed a feature-rich, responsive client-facing website aligned with company branding and quality standards, using Git for version control and CI/CD pipelines for automated build and deployment.

Built reusable, scalable UI components with thorough unit testing, documentation, and performance optimization.

Conducted regular code reviews to enforce code quality, consistency, and performance best practices.

Collaborated with cross-functional teams including designers, backend developers, and product managers to deliver efficient solutions on schedule.

Ensured application responsiveness across devices and browsers through rigorous cross-platform testing.

KEY PROJECTS

Human Resources Management System (HRMS)

Tech Stack: React.js, Next.js, Redux, Tailwind CSS, REST APIs, AWS Amplify, Git, CI/CD

Architected a comprehensive, enterprise-grade HRMS web application covering employee management, attendance tracking, leave management, payroll processing, and performance evaluation.

Developed the Payroll Employee Web App enabling employees to view payslips, manage payroll data, and track salary history with a secure, role-based interface.

Built the Recruiter Module for end-to-end hiring workflows including job postings, applicant tracking, interview scheduling, and onboarding pipeline management.

Implemented a role-based dashboard for HR admins and employees, providing secure, permission-driven access to organizational data and HR functions.

Used Next.js for server-side rendering (SSR) and performance optimization alongside React.js for dynamic, component-driven UI.

Integrated Redux for scalable, predictable state management across complex multi-module workflows.

Connected RESTful APIs for all CRUD operations, managed source code via Git/GitHub, and deployed the application on AWS Amplify using CI/CD pipelines for reliable, scalable cloud hosting.

Zunoy Admin Web App

Tech Stack: React.js, Tailwind CSS, RESTful APIs, Git

Developed a full-featured admin dashboard for the Zunoy platform, enabling administrators to manage products, users, subscriptions, and platform configurations.

Implemented alert and notification management features allowing admins to compose, schedule, and broadcast alerts and detail updates to end users.

Built data visualization dashboards with real-time analytics for monitoring platform usage, user activity, and business KPIs.

Designed role-based access control (RBAC) ensuring that admin actions and sensitive data are accessible only to authorized users.

Integrated RESTful APIs for seamless data synchronization between the admin panel and backend services.

Zunoy SaaS Website

Tech Stack: Vanilla JavaScript, Tailwind CSS, RESTful APIs, Git

Built a high-performance, responsive SaaS website using Vanilla JavaScript and Tailwind CSS without any frontend framework.

Unified 6 core Zunoy products into a single, cohesive business ecosystem with a seamless user journey.

Applied UTM tracking, cookie consent management, and user behavior analytics for accurate marketing attribution and data compliance.

Ensured mobile-first design, WCAG accessibility standards, and on-page SEO optimization across all pages.

Followed modular, maintainable code practices to ensure clean UI architecture and scalable future development.

EDUCATION

B.E. – Information Science and Engineering	December 2020 – 2024
<i>Vidya Vikas Institute of Engineering and Technology Mysore, India CGPA: 8.5/10</i>	
Pre-University Board (Science)	June 2018 – 2020
<i>Sai Nikethan Independent PU College Mudhol, India 84.6%</i>	
SSLC Board	June 2017 – April 2018
<i>Jaycee English Medium School Mahalingapur Mahalingapur, India 85.6%</i>
